

Response to the RFI for the RFP for the Pittville Road & Punkin Center Road Bridges
Design Project

The question has come up regarding the mandatory type selection report requirement. The three bridges in this proposal have been issued NEPA environmental clearance prior to September 30, 2021. The Bridge 7C-82, Beaver Creek, was issued NEPA environmental clearance on December 13, 2016; Bridge 7C-88, Muddy Slough No. 1, was issued NEPA environmental clearance on June 6, 2018; and Bridge 7C-89 Muddy Slough No. 2, was issued NEPA environmental clearance on June 6, 2018. Lassen County has determined the bridge type as described in the Request for Proposal.
